Voorbeelden

- ◉ Installatie van windows 8
- ◉ Installatie van Ubuntu
- ◉ Testen van linux distributies
- ◉ Antivirus
- ◉ Malware detectie
- ◉ Backups nemen
- ◉ Partitiemanager
- ◉

USB-stick

- Capaciteit usb-stick:
 - Win8: +_ 15GB
 - Ubuntu: 1 GB
 - Andere linux distributies: 1 GB
 - Antivirus: 300mb tot 1 GB
 - ...
- Fat32 (opgelet max 4GB per file)

◎ ISO files

- ISO: exacte kopie/image van een cd/dvd
- Handig: 1 file
- Makkelijk te beheren

◎ Yumi (software)

- Windows
- Ubuntu

Multiboot – Yumi (8 stappen)

1) Download Yumi

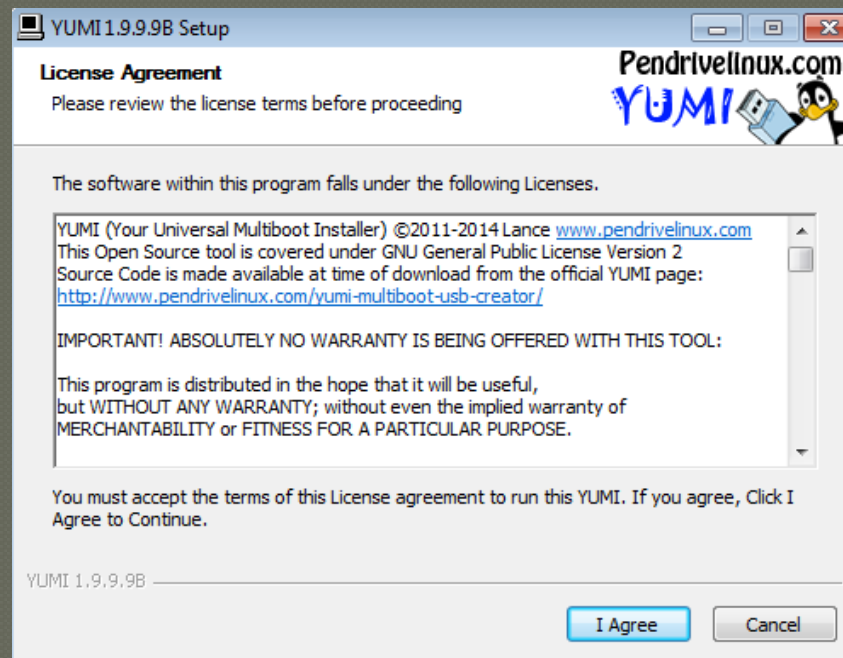

- <http://www.pendrivelinux.com/yumi-multiboot-usb-creator/>

2) Steek een USB stick met voldoende capaciteit in een USB poort

3) Open “Deze computer” en zorg ervoor dat je weet in welk station de usb-stick zit

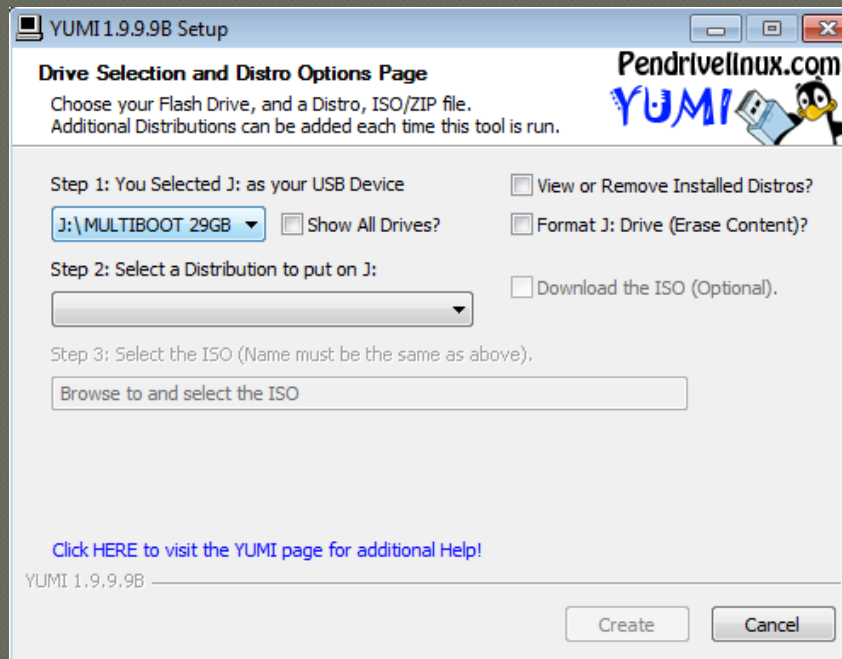

Multiboot – Yumi (8 stappen)

4) Open Yumi en accepteer

Multiboot – Yumi (8 stappen)

5) Selecteer de USB stick

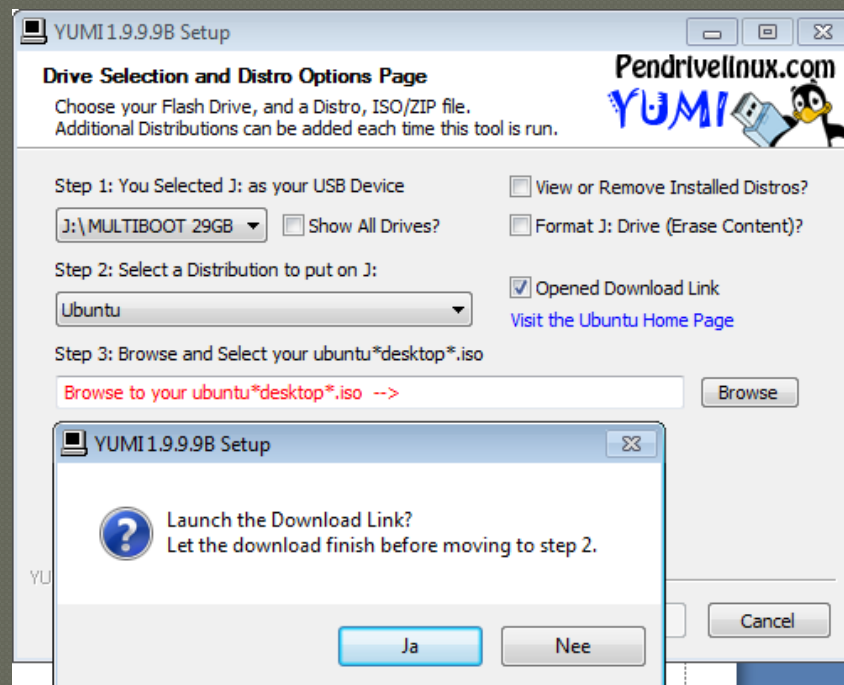

The screenshot shows the YUMI 1.9.9.9B Setup window. The title bar reads "YUMI 1.9.9.9B Setup". The main content area is titled "Drive Selection and Distro Options Page" and includes the website "Pendrivellinux.com" and the YUMI logo. The instructions state: "Choose your Flash Drive, and a Distro, ISO/ZIP file. Additional Distributions can be added each time this tool is run." The interface is divided into three steps:

- Step 1:** "You Selected J: as your USB Device". A dropdown menu shows "J:\MULTIBOOT 29GB". There are checkboxes for "View or Remove Installed Distros?", "Format J: Drive (Erase Content)?", and "Show All Drives?".
- Step 2:** "Select a Distribution to put on J:". A dropdown menu is empty. There is a checkbox for "Download the ISO (Optional)".
- Step 3:** "Select the ISO (Name must be the same as above)". A text box contains "Browse to and select the ISO".

At the bottom, there is a link: "Click [HERE](#) to visit the YUMI page for additional Help!". The version "YUMI 1.9.9.9B" is shown in the bottom left. "Create" and "Cancel" buttons are in the bottom right.

Multiboot – Yumi (8 stappen)

6) Selecteer een distributie en eventueel download link (niet nodig als iso op harde schijf staat)

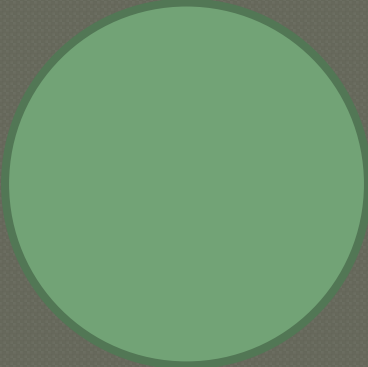

Multiboot – Yumi (8 stappen)

7) Klik op “create” en bevestig

8) Wacht een paar minuten en herhaal vorige stappen voor de overige distributies indien nodig

Voorbeeld usb-stick

- Multiboot stick

- Acronis malware scanner
- AVG antivirus
- Ubuntu
- Ubuntu server
- Win8 installatie
- Gparted partitiemanager
- ...

Windows 8 installatie

- ◉ Vmware op usb (vergadering oktober 2013)
- ◉ Windows to go (enterprise versie)
